Then the total amount is automatically debited from your account, details of all transactions will appear on your statement.

## Security On-line

As well as being widely accepted on-line, your Visa Debit card offers increased security through the Verified by Visa programme.

### What is Verified by Visa?

- ✓ Verified by Visa provides added protection to internet purchases by allowing you to use a password to authenticate payments. This ensures that only you the genuine cardholder, is making the purchase, giving you greater peace of mind.

### How does it work?

- ✓ Firstly, you need to register your own private password with us (see below). Then, when you shop at participating on-line retailers, you may be prompted to enter some characters from your password when you check-out – this verifies you as the genuine cardholder, just like entering a PIN.

### How do I register?

- ✓ When you shop at participating online retailers, you will be prompted to register. Once you have registered you can start making secure purchases using your Visa Debit card. There's no need to sign up for a new card, or download any new software.
- ✓ If you do not register at all, your transaction may be declined as part of our anti-fraud policy. You must keep your password secret.
