

Preparing your business for Brexit

Ulster Bank

help for what matters

Five steps you can take to help get ready for 31 October 2019

Need help?

The Government is working hard to get Ireland Brexit ready and has published information and supports to help your business prepare for Brexit. The latest information is hosted on the Government's main website at gov.ie/brexit⁽¹⁾

The UK is set to formally leave the European Union on 31 October 2019, either as part of a managed exit or without an agreed withdrawal deal (also referred to as No Deal Brexit).

While there is still uncertainty about the final outcome, we want to help ensure that you're informed and prepared in the final few weeks before the UK leaves the EU.

To help support you, we've collated a list of practical considerations and potential solutions that may help enable your business to both cope with and capitalise on the challenges and opportunities that Brexit brings.

Step 1

Make sure that you are prepared for possible changes to customs and duties

Do you trade with the UK or use the UK as a land-bridge to other countries? If you use a Revenue Commissioners deferred payment facility such as a guarantee, we recommend that you review your current arrangements to ensure that they will remain effective post-Brexit. Failure to have the correct deferred payment facility in place may result in the Revenue Commissioners having to terminate your deferred payment arrangement.

You will find comprehensive information about the customs procedures and rules for trade with non-EU countries at the [Revenue Commissioners Customs Traders and Agents Website](#)⁽²⁾ or you can contact the Revenue Team directly at brexitqueries@revenue.ie

A free training programme is available to eligible customs agents, customs intermediaries and affected businesses from Skillsnet Ireland. Details of the 'Clear Customs' training is available on their site: <https://www.skillnetireland.ie/clear-customs/>

Step 2

Ensure you have enough cash-flow and Inventory

A No Deal Brexit could lead to a lengthening of supply chains and more cash tied up in stock or unfinished goods.
